

## NFC Coin Tag

### RL-N30

#### Brief introduction

- \***Size:** Diameter 30mm
- \***Frequency:**13.56MHz
- \***Chip:**NTAG213

#### Product Features

- \*1. Chip NTAG213;Read/write
- \*2. Anti Metal, 3M Backside Adhesive ;
- \*3. Mainly used in Patrol Inspection

#### Specification

Model Number                      RL-N30

#### Performance Index

Material                                ABS

Color                                    Black

Size                                     Diameter:30 mm, Thickness:3mm

Chip                                      NTAG213

Memory                                144 Bytes

Frequency                             13.56MHz

Read Distance                        0-2cm(Depend on Reader and environment)

Read/Write                            Yes

Data storage                           10 Years

Work Temperature                   -25°C~ +65 °C

Storage Temperature                -30°C~ +70 °C

Application                            Equipment, Assets Patrol Inspection
